Learn how it works

This AI tool is designed to assist in early detection and should not replace professional medical advice. Always consult with a board-certified dermatologist for diagnosis and treatment.

How it works

Simple, fast, and accurate skin analysis in four easy steps

1

Take a photo

Use your smartphone to take a clear photo of the skin area you're concerned about.

2

AI Analysis

Our advanced AI analyzes your image for signs of melanoma and other skin conditions.

3

Instant Results

Receive a detailed report with risk assessment and recommended next steps.

Advanced AI Technology

Our algorithm has been trained on thousands of images and validated by board-certified dermatologists, achieving over 95% accuracy in detecting suspicious lesions.

Deep learning algorithms analyze visual patterns invisible to the human eye

Continuous improvement as our AI learns from new data

Privacy-focused design ensures your medical data remains secure

Why use SkinGlanceCare?

Catch potential issues early when they're most treatable. When detected early, melanoma has a 99% five-year survival rate.

Get instant preliminary results without waiting weeks for an appointment

Monitor skin changes over time with our comparison feature

Take control of your skin health today.

Get your first skin analysis for free. Early detection can save your life
